Pre-Emergent Herbicides + Dispatch® = More Control Over Weeds

Dispatch is the *only* patented penetrant proven to improve infiltration of water and herbicides.

DISPATCH
SPRAYABLE

DISPATCH
INJECTABLE

Better Delivery

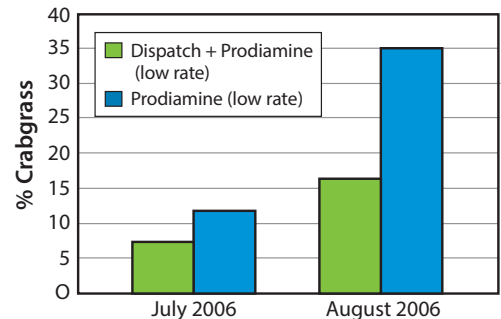

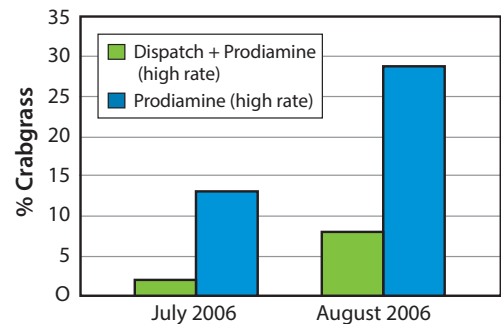

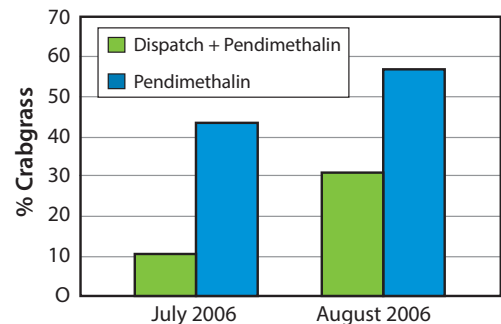

Many pre-emergent herbicides require activation through rain or irrigation; if herbicides sit on the surface and do not penetrate the thatch mat layer, they cannot block weed growth. Dispatch ensures infiltration and distribution of herbicides uniformly across the soil for better herbicide performance and weed control.

Better Weed Control

Research studies conducted 2 consecutive years show that Dispatch Sprayable tank-mixed with pendimethalin or prodiamine provides better crabgrass control than herbicides alone.

INNOVATE. IMPROVE. INSPIRE.

aquatrols.com |   

FOR MORE THAN 60 YEARS Aquatrols has been the world leader in the development and manufacturing of cutting edge soil surfactants and other specialty technologies that improve soil-water-plant interactions.

Today we offer a portfolio of conservation based solutions focused on three pillars of healthy plant growth and environmental stewardship: water management, nutrition conservation, and A.I. distribution and retention.
