

Dollars and Sense

Saving Money • Reducing Waste • Keeping Turf Healthy

Insecticides + Dispatch® = Better Results with Lower Rates

Dispatch is the *only* patented penetrant proven to improve water movement through the thatch and increase the efficacy of soil targeted insecticides on turf.

Keep your insecticide *and* your budget on target with Dispatch.

Precise Placement

Stop your insecticides from getting bound up in organic matter in the thatch layer. Dispatch maximizes penetration of water and insecticide through thatch and the soil surface. When insecticide is applied with Dispatch, more is able to get into the soil for more even distribution and improved target placement.

Less is More

Dispatch can be tank mixed with a liquid insecticide application or sprayed after a granular insecticide application before it is watered in. Adding Dispatch to your insecticide program allows you to use lower rates without sacrificing performance. Dispatch allows you to do more with less and save money.
