**RE: Composition statement regarding Agrocarb 110 - SA**

To our Valued Customer,

Omya Canada's Agrocarb 110 - SA product is produced by the screening and crushing of naturally-occurring limestone ore. The finished product is composed of 100% naturally-occurring material consisting of calcium carbonate with varying quantities of impurities such as silica. There are no additives or processing chemicals used in the production of Agrocarb 110 - SA.

As such, the composition of Agrocarb 110 - SA is included on Canada's "Organic production systems Permitted Substances List" as "Calcium carbonate (calcitic limestone)".

Thank you for your interest in Omya products. If there are any questions about this correspondence, please feel free to contact Omya's Product Regulatory Affairs Department at 513-387-4654.

Sincerely,

A handwritten signature in blue ink, reading "Bradford J. Searcy". The signature is written in a cursive style with a large, prominent 'B' and 'S'.
