

FISH

FISH HYDROLYSATE

FEATURES AND BENEFITS

FISH hydrolysate is a cold-processed, live and nutrient-rich fertilizer, not sterilized with high heat like an emulsion. FISH is 100% natural, no chemicals added.

SOIL HEALTH

- Helps replenish the microbiology destroyed by pesticides, herbicides, chemical fungicides, etc.
- Excellent food source for micro-organisms and mycorrhizae that aid the roots in nutrient and water absorption.
- Excellent food source for earthworms that increase organic matter in the soil.

MORE YIELD, BETTER CROPS

- Improves seed germination and root development.
- Promotes healthy nitrogen levels.
- Contains calcium – essential for increasing the Brix level (amount of sugar) in plants.
- Contains iron – essential for increasing and stabilizing chlorophyll production.
- Contains a wide range of trace elements.

**AN INJECTION OF LIFE
FOR YOUR PLANTS!**

TWO FISH, ONE STONE

Helps control the Asian carp population, an invasive species in North American waterways.

FISH

FISH HYDROLYSATE

Fertilizer Banded on Field Corn, Albert Lea, MN, USA

CASE IN POINT

Corn grown in soil banded with FISH hydrolysate as part of an organic crop nutrition program.

RESULTS

Yield: + 21,2% yield increase over untreated control
ROI: + 37,08\$ in net profit per acre

BOOST YIELD, BOOST PROFITS...NATURALLY

The Agriculture Division of Earth Alive is based on one simple conviction: a healthy and natural soil is essential for productive and sustainable agriculture. We have developed product lines that are not only environmentally friendly but also sustainable and human friendly. The creation and availability of organic input options for all scales of agricultural production is a major issue in the worldwide supply chain. We offer cutting-edge soil amendments and inputs to meet the needs of all organic and natural agricultural producers.
