

CREEPING BENTGRASS

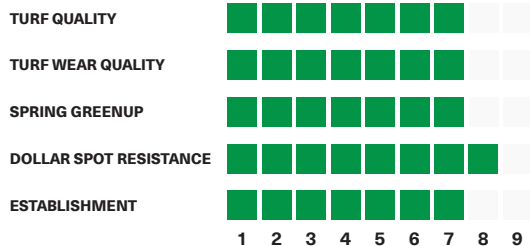

Macdonald

Macdonald - Creeping bentgrass (DLFPS-AP/3018 or AP-18) is a versatile creeping bentgrass appropriate for greens, tees and fairways. Named for Charles B. Macdonald who is considered the Father of Golf Course Architecture, a cultivar named for him should demonstrate superior performance. Developed by DLF Pickseed and Rutgers University, Macdonald enables golf courses to be maintained with lower inputs and yet produce a superior product. Macdonald was developed for high resistance to many diseases including Dollar Spot, Anthracnose, Brown Patch and Pink Snow mold.

Macdonald was developed with high density and early spring green-up that makes for superior greens grass it also has growth form and fine texture that prevents scalping and reduces thatch build-up when used for fairways. c

(Rating: 1- 9, 1: Poor; 9: Excellent)
