Tonne Ton 2500 lbs

Fine-Grade

Tonne Ton

General Information

Nutri-Wave™ 4-1-2 is a Natural organic dehydrated topdress made from "Mother Nature's" richest source of organic Nitrogen (Poultry Manure). This rich source of organic nitrogen will provide the best possible balance of nutrients and organic matter to your soil, which will enhance your soils life. The organic matter contained in each Nutri-Wave™ 4-1-2 granular pellet will stimulate the microbes in your soil causing them to breakdown the complex organic compounds, providing your plants with all the beneficial nutrients they need to grow.

Environmentally Friendly - Slow Release - Non Burning

The organic dehydrated topdress approach provides the most effective "Slow Release" method of feeding your plants and landscapes. The Nitrogen contained within the organic granulated pellets is released as it is needed. Given your landscape just the right amount of nutrients that it requires. Because of this slow release, your plants and soil organisms absorb nutrients before they leach through your soil. With all the beneficial nutrients contained within the Nutri-Wave™ granular pellet, there is no need to add any chemical salts, given you the peace of mind "knowing that your landscape will not face the risk of burning".

General Analysis

Total Nitrogen (N):4.0%
0.75% Water-Soluble Nitrogen
3.25% Water-Insoluble Nitrogen

Available Phosphorus (P₂O₅):1.0%

Soluble Potash (K₂O):2.0%

Calcium3.0%

Magnesium0.7%

PH6.3

Easy to Apply

The uniform sized granular pellets are easy to apply using conventional spreader equipment, with no risk of burning or overlap.

Instructions for General Use:

Lawns and Golf Courses

Spring: Apply 50lbs of Nutri-Wave™ 4-1-2 / 3000 sq. ft.

Summer: Apply 25lbs of Nutri-Wave™ 4-1-2 / 3000 sq. ft. (When applying to tees during Summer, coverage should take place monthly)

Fall: Apply 50lbs of Nutri-Wave™ 4-1-2 / 3000 sq. ft.

* For early spring green-up, apply 50lbs of Nutri-Wave™ 4-1-2 / 2000 sq. ft. (until the first permanent snow coverage)

*Please note that Nutri-Wave™ application rates listed above should be used as a general guide. It is recommended that Nutri-Wave™ be used as part of a complete fertilization program and its recommended that soils be tested prior to use.

Storage

It is recommended that this product be stored in a cool, dry place out of reach of children and pets.

Precautions

It is essential to add plenty of water to your growing medium. If you are allergic to chickens or feathers, avoid direct contact. As with all gardening products proper care should be taken during use. The use of gloves and proper washing of hands and vegetables before eating is recommended. This product is designed solely for agricultural and/or horticultural application. Animals or humans should not consume this product at anytime. In case of contact with eyes, rinse thoroughly with water. Dust from this product and any product of similar content could be harmful if inhaled. Always handle in a well-ventilated area.
