

# TREE I.V.

MICRO INFUSION®

## TREE I.V. MICRO INFUSION® KITS

The most versatile injection system available – effective for all tree types. Its closed system directly and safely infuses pest control, disease control, and nutritional products with reduced environmental exposure. High volume, low pressure, lightweight and easy to use. The TREE I.V. works with all mixable products. The Arborjet® systems are the only tree injection systems using Arborplug™ technology to assure your treatment is fast, safe, and effective.

### TREE I.V. 2-PACK KIT

High volume, low pressure, can be used with mixable products.  
The TREE I.V. is the perfect starter kit.

### DELUXE KIT

This kit now includes three TREE I.V. Systems and one QUIK-jet® System. For high & low dosage applications in all tree sizes and all tree types. Everything you need for high production use in one box!

The Arborjet TREE I.V. is the most effective and versatile injection system available to treat your trees. It works for all deciduous and coniferous trees.

### How Much Does it Cost to Treat a Tree?

- Medicament costs can be less than \$10 per tree.
- Nutrition costs as little as \$5 per tree.

### How Long Does it Take to Treat with the TREE I.V.?

Approximately 10-15 minutes per tree. Using multiple TREE I.V.'s, the applicator can treat multiple trees simultaneously.

*"Arborjet is by far the best equipment purchase I've ever made. It paid for itself in two jobs!"*

~ Ryan Franks, Appalachian Tree Care  
Asheville, North Carolina
