

ASPERELLO

T34 BIOCONTROL

MAKES THE DIFFERENCE

Trichoderma products are a dime a dozen these days, Asperello stands out from the crowd.

- ✓ Based on the unique beneficial fungus *Trichoderma asperellum* T34
- ✓ Isolated from *Fusarium* suppressive compost
- ✓ Selected from among several hundred *Trichoderma* strains for efficacy and aggressiveness against diseases
- ✓ Highly concentrated ($\geq 10^9$ CFU/g), therefore active at low dose rate
- ✓ Root protection with Asperello comes at a very attractive price

**ASPERELLO PROTECTS
ORNAMENTAL PLANTS
AGAINST THE MAJOR
ROOT DISEASES**

- ✓ *Fusarium*
- ✓ *Pythium*
- ✓ *Phytophthora*
- ✓ *Rhizoctonia*

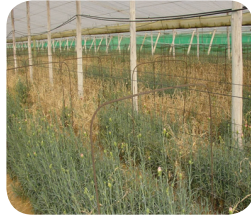

A STITCH IN TIME SAVES NINE

Apply Asperello preventatively. Not only will it protect your plants from diseases, often it also stimulates root development in the absence of pathogens.

Asperello has multiple modes of action. That's why the product is flexible, efficient in many situations and against many diseases. Furthermore, in contrast to chemical pesticides, resistance development is not a worry.

- ✓ Asperello colonizes the roots, forms a barrier against pathogens and supports healthy root growth
- ✓ Asperello triggers plant's natural defense mechanisms
- ✓ Asperello parasitizes and actively kills pathogens

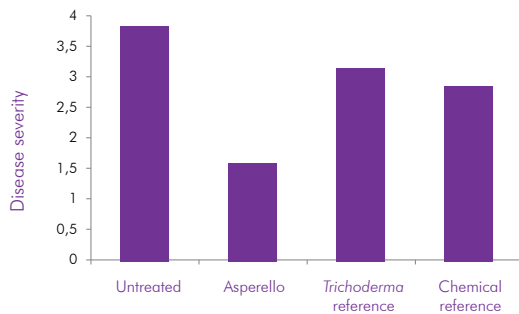

RESULTS SPEAK LOUDER THAN WORDS!

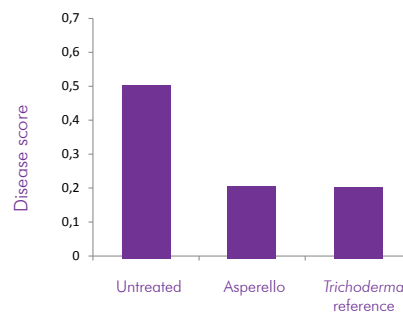

Commercial greenhouse naturally infected with *Fusarium oxysporum* f.sp. *dianthi*

Commercial greenhouse treated with Asperello

Efficacy of Asperello against *Fusarium oxysporum* in carnation

Efficacy of Asperello against *Pythium* in pansies
